The Little Book of Smart Paul Jackson 2008-02-01 What started off as an idea from Swiss watchmaker Swatch eventually evolved into the successful launch of the smart brand, now an integral part of the Mercedes-Benz family and -- in its first ten years -- achieving sales of more than three quarters of a million cars around the world. It hasn't all been plain sailing for smart, though. Well-publicized financial woes, the launch of at least one inappropriate model range and the subsequent rationalization of the entire product line-up meant plenty of problems along the way. But throughout it all, fans of the smart concept have remained loyal to the brand and sales of the fortwo city car continued to prosper. These days, the future looks rosier. An all-new for two model range was launched in 2007, along with the announcement of the long-awaited debut of the smart brand into the American market for 2008. The latest model is more sophisticated and more in tune with today's buyers tastes, while losing none of the inventiveness, practicality and sheer chic appeal of its predecessors. In "The Little Book of Smart," author and smart fanatic Paul Jackson guides us through the entire history of the brand, its highs and lows, its successes and failures, and on to today -- with the very latest for two line-up promising major sales worldwide and, of course, helping to pave the way for a future for smart in the USA. It's a fascinating tale, told succinctly and in an entertaining style, and complemented by full color photography throughout.

Plastic Toy Cars of the 1950s and 1960s Andrew Ralston 2007 The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinsplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

Runways & Racers Terry O'Neil 2011-05-19 Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.
