Gun Violence and Mental Illness Liza H. Gold, M.D. 2015-11-17 Perhaps never before has an objective, evidence-based review of the intersection between gun violence and mental illness been more sorely needed or more timely. Gun Violence and Mental Illness, written by a multidisciplinary roster of authors who are leaders in the fields of mental health, public health, and public policy, is a practical guide to the issues surrounding the relation between firearms deaths and mental illness. Tragic mass shootings that capture headlines reinforce the mistaken beliefs that people with mental illness are violent and responsible for much of the gun violence in the United States. This misconception stigmatizes individuals with mental illness and distracts us from the awareness that approximately 65% of all firearm deaths each year are suicides. This book is an apolitical exploration of the misperceptions and realities that attend gun violence and mental illness. The authors frame both pressing social issues as public health problems subject to a variety of interventions on individual and collective levels, including utilization of a novel perspective: evidence-based interventions focusing on assessments and indicators of dangerousness, with or without indications of mental illness. Reader-friendly, well-structured, and accessible to professional and lay audiences, the book: \* Reviews the epidemiology of gun violence and its relationship to mental illness, exploring what we know about those who perpetrate mass shootings and school shootings. \* Examines the current legal provisions for prohibiting access to firearms for those with mental illness and whether these provisions and new mandated reporting interventions are effective or whether they reinforce negative stereotypes associated with mental illness. \* Discusses the issues raised in accessing mental health treatment in regard to diminished treatment resources, barriers to access, and involuntary commitment.\* Explores novel interventions for addressing these issues from a multilevel and multidisciplinary public health perspective that does not stigmatize people with mental illness. This includes reviews of suicide risk assessment; increasing treatment engagement; legal, social, and psychiatric means of restricting access to firearms when people are in crisis; and, when appropriate, restoration of firearm rights. Mental health clinicians and trainees will especially appreciate the risk assessment strategies presented here, and mental health, public health, and public policy researchers will find Gun Violence and Mental Illness a thoughtful and thought-provoking volume that eschews sensationalism and embraces serious scholarship.

Okinawan Te (Martial Art of Kings & Nobles) Revealed, Second Edition (Revised & Expanded) Mark D Bishop 2017-08-21 Another revealing book by Mark D Bishop. This work expands on the original best-selling version, by including more than 40 extra pages and further explaining the methodology of applications, as well training methods, for proper conditioning. Providing a teaching format for the instructor, it is also an informative workbook for the beginner and a how-to-do manual for those already with experience in the martial arts. In effect, it is the first ever work that deals thoroughly with the training and techniques of Okinawan Te as it developed from 1609, following the Satsuma Invasion of the Ryukyu Islands, until 1879, when the monarchy was dissolved by Japan. Until now, despite demonstrations of its effectiveness, the study of and training in Okinawan Te of this period has been known only to a few adherents. This has led to a mystification and often false representation. However, this can no longer be the case, as all is uncovered in this detailed and brilliantly coordinated work.

Analysis of Engineering Design Studies for Demilitarization of Assembled Chemical Weapons at Blue Grass Army Depot National Research Council 2002-10-27 The U.S. Army is in the process of destroying the nation's stockpile of aging chemical weapons stored at eight locations in the continental United States and on Johnston Atoll in the Pacific. Originally, incineration was chosen for the destruction of these stores, but this method has met with public opposition, and Congress directed the Army to develop alternative technologies for destroying the stockpiles in Pueblo, CO and Richmond, KY. To assist the Army in this process, the NRC was asked to evaluate the engineering design study of the three Blue Grass candidates. This book presents an analysis of various issues pertaining to the proposed engineering design package for the Blue Grass facility.

Ecological Risks Associated with the Destruction of Chemical Weapons Vladimir M. Kolodkin 2006-08-29 1 2 Prof. Dr. Vladimir Mikhailovitch Kolodkin, Prof. Dr.-Ing. Wolfgang Ruck 1 Institute of Natural and Technogenic Disasters, Udmurt State University, Izhevsk (Russia), 2 Institute of Ecology and Environmental Chemistry, University Lüneburg (Germany) During the Cold War a whole arsenal of deadly chemical weapons was allowed to build up on both sides of the ideological divide. Happily, today the problems are reversed. Expertise is now required in the field of safe and environment-friendly disposal of chemical weapons and cleaning up of contaminated sites all around the world, but not least in the ex-Soviet-led countries. The participants and speakers to the NATO-Russia advanced research workshop on the "Ecological Risks Associated with the Destruction of Chemical Weapons", hosted by the University of Lüneburg on 22 - 26 October, 2003, therefore, came from many different parts of the world. Of the eight countries represented at the workshop, two were ex-Eastern-Block, and six were Western countries. Yet the West was by no means overrepresented. On the contrary, the Russian expert-speaker contingent, with 33 participants, did justice to the size of their country – and to their chemical-weapons problem – and provided the majority of active participants. In all, there were 57 participants, of which 11 dispatched from the TACIS project "The development of the chemical weapons" facility at the detached plant No 4 of OAO Khimprom, Novocheboksarsk.

Why We Are Losing the War on Gun Violence in the United States Marie Crandall 2020-12-09 This edited collection of data and perspectives takes a fresh approach to gun violence prevention by addressing the question, "why are we losing the war on gun violence in America?" Although successes and failures in the prevention of gun violence are examined, it is a war we are losing, due to restrictions on research funding, entrenched historical perspectives, structural violence, and perhaps differing priorities or views on what is right or wrong. Gun violence is a public health crisis. It remains politicized and has been paralyzed with inaction. In the chapters, the authors write candidly about the challenges that have thwarted gun violence prevention, as well as highlight possible strategies for progress to save lives. Critical areas explored among the chapters include: Gun Violence, Structural Violence, and Social Justice School Shootings: Creating Safer Schools Mental Illness and Gun Violence Understanding the Political Divide in Gun Policy Support The Second Amendment and the War on Guns The Impact of Policy and Law Enforcement Strategies on Reducing Gun Violence in America Youth Gun Violence Prevention Organizing Smart Guns Don't Kill People With this compendium, the editors and authors hope to bridge the growing gap between groups or ideologies, and create common ground to discuss workable solutions. Why We Are Losing the War on Gun Violence in the United States is essential reading for a broad audience including practitioners, academics, researchers, students, policy-makers, and other professionals in public health, behavioral sciences (including social work and psychology), social sciences, health sciences, public policy, political science, and law, as well as any readers interested in the path to decreasing gun violence in America.

Tabernacle of Hate Kerry Noble 2011-01-05 In the summer of 1984, Noble came within seconds of committing what would have been the largest domestic terrorist act in U.S. history at that time. As one of the founders of the Covenant, Sword, and Arm of the Lord (CSA), a cult paramilitary group, he carried a bomb into a gay-affirming church, intending to murder over seventy congregants. In Tabernacle of Hate, Noble provides an unprecedented first-person account of how a small spiritual community moved from mainstream religious beliefs to increasingly extreme positions, eventually transforming into a domestic terrorist organization. Written after his release from prison, the author's cogent narrative reveals the deceptive allure of extremist movements and the unmatched power of charismatic leadership. Noble also chronicles the intense standoff with federal agents at the group's compound in northern Arkansas in April 1985. Originally published in 1998, this second edition includes an authoritative introduction placing Noble's narrative and the CSA into the broader picture of American religio-political extremism.

While this second edition of the autobiography of Stanton O. Berg's (Stan's) life and times, is also a short history of United States during the Great Depression and also the history of the development of the forensic science with some inclusion of Sherlock Holmes in that history. Stan's four years army service in the Counter Intelligence Corps at Baltimore, Maryland, and his weekend work with the Baltimore Police crime laboratory is reviewed. In looking back at Stan's forensic science career, one will find Stan handled one thousand cases, testified in legal proceedings over 350 times. Stan with his wife June, as his administrative assistant, attended 170 forensic science conferences in the US, Canada, and Europe. Stan often was a conference speaker and four times served as conference chairman. As Stan looks back at his career, he finds that, in some way or the other, Stan has been involved in almost every important case during the wild '60s and '70s—the assassinations of Pres. John Kennedy, Martin Luther King Jr., and Robert Kennedy; Chicago Police shooting raid on Black Panther headquarters; and the SLA ambush shooting of Oakland School superintendent with cyanide-tipped bullets. Stan's career also consisted of much investigation and testimony in the area of civil litigation, gun accidents, and gun safety designs. This second edition of Stanton O. Berg's (Stan's) autobiography has been greatly enlarged and expanded from the first edition. The first edition had only sixty-nine photographs and illustrations while this second edition has some 156 photos and illustrations. It explores what the underlying elements are that look through each of the lenses of the Individual, Leaders and leadership, the Systems we use and the workplace Cultures. It does this by exploring each of 12 underlying elements (Chapter 1), what leaders' practices and routines might look like (Chapter 2), barriers to implementation and their remedies (Chapter 3), how to use the Essentials of Safety to learn after incidents (Chapter 4), and how to measure the effectiveness in the workplace of each of the essential elements (Chapter 5). It is designed to promote thinking, not to be a set of instructions.
