Moussa, of de dood van een Arabier Kamel Daoud 2015-10-06 Met Moussa of de dood van een Arabier heeft Kamel Daoud een stem gegeven aan 'de Arabier' uit de Franse klassieker De vreemdeling van Albert Camus. Haroen wordt al zijn hele leven gekweld door de zinloze moord op zijn broer door Meursault, de beruchte antiheld uit Camus' roman. Haroen besluit zijn broer uit de anonimiteit te halen door hem een naam te geven: Moussa. En een stem, die de gebeurtenissen beschrijft die leidden tot Moussa's dood op een oogverblindend Algerijns strand. De roman Moussa of de dood van een Arabier is

tegelijkertijd een liefdesverklaring aan en overpeinzing van de Arabische identiteit, waarin het kolonialisme en de druk van het geloof een grote rol spelen. Kamel Daoud won met *Moussa of de dood van een Arabier* de Prix Goncourt du Premier Roman 2015.

How I Overcame Alcoholism and Thought About Life in General Bill Hieser 2021-07-21 The basis of this book is how I overcame my drinking problem. I was trapped in a cycle of restricted drinking followed by uncontrolled binges. I believe this is a common pattern. Conventional approaches of abstinence and harm-minimisation actually exacerbate the problem. I devised a routine of cycles between drinking a lot, then drinking less each cycle. Each cycle I drink a bit less. An advantage of cycles is the drinker can compare the difference between drinking different amounts of alcohol. There are pluses and minuses for each amount but drinking less enables more to be done in other areas. Once a drinker can control his drinking he can decide what is best for him. I have included my thoughts about life in general which I hope are of interest to the reader.

Data Culture and the Organisation of Teachers' Work Nerida Spina 2020-07-24 Data Culture and the Organisation of Teachers' Work provides an in-depth look at how the political and media scrutiny of teachers, pupils and schools now organises teaching and learning. Spina also examines how educational data is used in schools, and where it fails to take account of the everyday experiences of school leaders, teachers and students. Drawing on primary research, and discussing practice in relation to the National Assessment Programme: Literacy and Numeracy (NAPLAN), this book discusses the strengths and weaknesses of a data-driven approach, the restrictions this can impose and how to navigate them as a teacher. Ideal for scholars and postgraduate students of education, this book provides a comprehensive institutional, ethnographic look into the daily lived experiences of teachers, and the effects of standardised testing.
