Neurodiversity Thomas Armstrong 2010-05-25 A new term has emerged from the disability movement in the past decade to help change the way we think about neurological disorders: Neurodiversity. ADHD. Dyslexia. Autism. The number of categories of illnesses listed by the American Psychiatric Association has tripled in the past fifty years. With so many people affected by our growing -- culture of disabilities, -- it no longer makes sense to hold on to the deficit-ridden idea of neuropsychological illness. With the sensibility of Oliver Sacks and Kay Redfield Jamison, psychologist Thomas Armstrong offers a revolutionary perspective that reframes many neuropsychological disorders as part of the natural diversity of the human brain rather than as definitive illnesses. Neurodiversity emphasizes their positive dimensions, showing how people with ADHD, bipolar disorder, and other conditions have inherent evolutionary advantages that, matched with the appropriate environment or ecological niche, can help them achieve dignity and wholeness in their lives.

Routledge Handbook of the History of Sustainability Jeremy L. Caradonna 2017-10-18 The Routledge Handbook of the History of Sustainability is a far-reaching survey of the deep and contemporary history of sustainability. This innovative resource will help to define the history of sustainability as an identifiable field. It provides a unique resource for advanced undergraduates, graduate students, and scholars, and delivers essential context for understanding the current state and future path of the sustainability movement. The history of sustainability is an increasingly important domain within the discipline of history, which draws on an interdisciplinary set of fields, ranging from energy studies, transportation, and urbanism to environmental history, economics, and philosophy. Key sections in this handbook cover the historiography of sustainability, resilience and collapse in historical societies, the deep roots of sustainability (seventeenth century to nineteenth century), the recent history of sustainability (twentieth century to present), and core issues and key debates in sustainability. This handbook is an invaluable research and teaching tool for those interested in the history and development of sustainability and an essential resource for the many sustainability studies programs that now exist in the world's universities.

Voices of the Indian Diaspora Anand Mulloo 2007 About the Book: Spread over a wide canvas, but focused entirely on the Indian diaspora, Mulloo attempts a diasporic perspective by using the inter disciplinary tools of history, economics, politics and sociology to narrate the story of overseas Indians.

Pathways of Power Eric R. Wolf 2001-01-03 "This collection of twenty-eight essays by Eric R. Wolf is a legacy of some of his most original work, with an insightful foreword by Aram Yengoyan."--Jacket.

The Politics of Sport Paul Gilchrist 2013-09-13 Sport is an essential part of community structure, membership and identity. Whether on the field of play, in stadia, or on the streets, sport has consistently brought together disparate individuals to share culture, values and memories. Nowadays these relationships are being rewritten through the effects of global socio-economic practices, the interventions of government, the impact of cultural imperialism and, at the local level, through the actions of individuals and new constituencies that are emerging in response. Furthermore, this generates discourse on matters of regional and national identity. This themed issue presents a range of essays that examine the relationship between sport and society through the conceptual lenses of community, mobility and identity. Drawing upon insights from contemporary history and current political phenomena from leading academic specialists in the field, the issue addresses cross-cutting themes such as loyalty and allegiance, migration and integration, identity and collective memory, and the politics of resistance and change, which will be of interest to the political scientist, the contemporary historian and sport scholar alike. This book was previously published as a special edition of the journal Sport in Society.

The Labyrinth of Modernity Johann P Arnason 2020-06-16 This important new book by a major voice in the Social Imaginaries movement offers the most systematic attempt to establish conceptual and historical links between the idea of modernity as a new civilization and the notion of multiple modernities. Arnason demonstrates a theory of globalization that is still compatible with the emphasis on unity and diversity of modernity as a civilization.--Wolfgang Knöbl, Hamburg Institute for Social Research and Leuphana University Lueneburg

Human Rights, Diversity, and National Identity 2011 Fundamental world changes that simultaneously undermine a nation-state's charisma and promote the rise of a supra-national system have wide-ranging effects upon national states within a modern global society. My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling, which are central institutions in every country. Globally, primary and secondary education initially emerged as the premier tool for nation-states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition. I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education. The analyses consist of two sections. Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970-2008. These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well-established liberal democracies. Cross-national, quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia (BC), which examines nation-building within a context of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents, including Ministry of Education reports, curricular frameworks, and high school exit exams. Process-wise, I find the incorporation of human rights and diversity reflects macro-level changes in national and global society. Content-wise, I find four main approaches to reconciling ideas of human rights and diversity with national identity: (1) framing human rights and multiculturalism as part of national identity, (2) using pedagogical approaches that promote multiple perspectives and individual agency, (3) celebrating social and scientific figures and accomplishments as the source of national pride, and (4) drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non-state actors are important and legitimate agents of social change.

Handbook of International Relations Walter Carlsnaes 2002-03-13 NEW IN PAPERBACK FEBRUARY 2005! `The most systematic and wide-ranging survey of the multi-faceted field of International Relations yet produced. It is sure to become a standard reference work and teaching text, and is unlikely to be superseded at any time in the near future. It should be considered as essential reading' - International Affairs The Handbook of International Relations, published 2002 in hardback, quickly established itself as the benchmark volume, providing a state-of-the-art review and indispensable guide to the study of international relations. It is now released in paperback, in order to be accessible to students in classroom use. Divided into three parts, the volume reviews both the historical, philosophical, analytical and normative roots to the discipline and the key contemporary topics of research and debate today. The first part introduces the major approaches within the field and unpacks many of the on-going debates within the discipline including those between rationalist and constructivist approaches. The second part moves on to explore the key concepts and contextual factors important to the subject from concepts like the state and power, to international and transnational actors, debates around globalization, and contending feminist perspectives. The final part reviews a number of the key substantive issues in international relations and is designed to complement the analytical tools and perspectives presented in Parts I and II. Examples of the many topics included are: foreign policy; war and peace; security; nationalism and ethnicity; finance; trade; development; the environment; and human rights.

Science, Religion and Deep Time Lowell Gustafson 2022-06-30 This book examines the meaning of religion within the scientific, evidence-based history of our known past since the big bang. While our current major religions are only centuries or millennia old, our volume discusses the origins and development of human religious practice and belief over our species' existence of 300,000 years. The volume also connects the scientific approach to natural and social history with ancient truths of our religious ancestors using new lines of inquiry, new technologies, new modes of expression, and new concepts. It brings together insights of natural scientists, social scientists, philosophers, writers, and theologians to discuss narratives of the universe. The essays discuss that to apprehend religion scientifically, or to interpret and explain science theologically, the subject must be examined through a variety of disciplinary lenses simultaneously and raise several theoretical, philosophical, and moral problems. With a singular investigation into the meaning of religion in the context of the 13.8 billion-year history of our universe, this book will be indispensable for scholars and students of religious studies, big history, sociology and social anthropology, philosophy, and science and technology studies.

Children, Play, and Development Fergus P. Hughes 2009-04-02 "Quite simply, this is the best text on play and development I have ever read. It was thought provoking while being reader-friendly at the same time. This work is very thorough and would be an excellent text for undergraduate or experienced in-service graduates." —L. Kathryn Sharp, The University of Memphis A comprehensive look at children's play from birth to adolescence Children, Play, and Development, Fourth Edition, discusses the relationship of play to the physical, social, intellectual, and emotional growth of the child. Author Fergus P. Hughes focuses on the historical, sociocultural, and ethological context of play; the role of development in play; and the wide range of theories that provide a framework for interpreting play. The changes in this thoroughly updated Fourth Edition include new information on cultural differences in object play, a critique of experimental research on play across cultures, brain correlates of aggressive play in humans and animals, the development of the young child's ability to distinguish between reality and make-believe, computers in the classroom, the development of emergent literacy, and the impact of attachment on children's development. Key Features Offers thorough coverage of theoretical perspectives on play, showing readers how theories contribute to a scientific understanding of play Provides an up-to-date review of the literature, with nearly half of the references new to this edition Includes a rich variety of pedagogical features that illustrate key points and help stimulate class discussions Presents Putting Theory Into Practice sections (two per chapter) that contain practical applications of theory and research High-Quality Ancillaries Instructor Resources on CD include PowerPoint presentations, a comprehensive test bank, and more. Between Consenting Peoples Jeremy Webber 2010-10-28 Consent has long been used to establish the legitimacy of society. But when one asks – who consented? how? to what type of community? – consent becomes very elusive, more myth than reality. In Between Consenting Peoples, leading scholars in legal and political theory examine the different ways in which consent has been used to justify political communities and the authority of law, especially in indigenous-nonindigenous relations. They explore the kind of consent – the kind of attachment – that might ground political community and establish a fair relationship between indigenous and nonindigenous peoples.

1491 Charles C. Mann 2012-07-03 1491 verandert voorgoed ons beeld van de geschiedenis van de amerika's In 1491 woonden er misschien wel meer mensen in Amerika dan in Europa. Grote steden als Tenochtitlán hadden stromend water en bezaten prachtige botanische tuinen. In Mexico verbouwden precolombiaanse Indianen maïs volgens zeer geavanceerde teelttechnieken. De Inca's hadden het grootste rijk in de toenmalige wereld opgebouwd, groter dan de Ming-dynastie of het Ottomaanse Rijk. Totdat de Europeanen met hun geweld en ziektes hier een einde aan maakten. 1491 maakt voor eens en voor altijd duidelijk dat de geschiedenis van Amerika zeker niet begint met Columbus, die in 1492 op een van de Bahama's voet aan wal zette Charles C. Mann schreef een heldere en levendige synthese van wat door historici, geografen en archeologen de afgelopen dertig jaar is ontdekt over de prestaties en het lot van de oorspronkelijke inwoners van Amerika. Mann ontkracht op overtuigende wijze talloze mythen en neemt de lezer mee naar de intrigerende, hoogontwikkelde wereld van onder meer de Inca's, Azteken en Maya's. 'Mann maakt korte metten met het inheemse Amerika van de schoolboekjes: passief, primitief en in de confrontatie met Europa gedoemd te verdwijnen.' NRC Handelsblad 'Mann heeft een mooi en aanstekelijk boek geschreven.' Trouw [...] een zeer nauwgezette, weloverwogen zoektocht naar het antwoord op de vraag: Hoe zag de Nieuwe Wereld er ten tijde van Columbus uit.' Natuur, Wetenschap & Techniek 'Krachtig, uitdagend en belangrijk [...] 1491 dwingt ons na te denken over de wijze waarop de geschiedenis van Amerika wordt onderzocht.' The Washington Post 'Voor iedereen die denkt dat het één grote wildernis was, zal dit boek een fascinerende verrassing zijn.' The Times Tijdens een bezoek aan Yucatán, overdunderd en betoverd door de Maya-ruïnes, werd het Charles Mann in alle omvang duidelijk dat Columbus in 1492 een hemisfeer met mensen en culturen betrad die in alles verschilde van de ons toen bekende werelddelen Europa en Azië. Mann schrijft voor Science en The Atlantic Monthly.

Transnational Faiths Hugo Córdova Quero 2016-02-17 Japan has witnessed the arrival of thousands of immigrants, since the 1990s, from Latin America, especially from Brazil and Peru. Along with immigrants from other parts of the world, they all express the new face of Japan - one of multiculturalism and multi-ethnicity. Newcomers are having a strong impact in local faith communities and playing an unexpected role in the development of communities. This book focuses on the role that faith and religious institutions play in the migrants' process of settlement and integration. The authors also focus on the impact of immigrants' religiosity amidst religious groups formerly established in Japan. Religion is an integral aspect of the displacement and settlement process of immigrants in an increasing multi-ethnic, multicultural and pluri-religious contemporary Japan. Religious institutions and their social networks in Japan are becoming the first point of contact among immigrants. This book exposes and explores the often missed connection of the positive role of religion and faith-based communities in facilitating varied integrative ways of belonging for immigrants. The authors highlight the faith experiences of immigrants themselves by bringing their voices through case studies, interviews, and ethnographic research throughout the book to offer an important contribution to the exploration of multiculturalism in Japan.

Het achterhuis Anne Frank 2009-10-31 Anne Frank hield van 12 juni 1942 tot 1 augustus 1944 een dagboek bij. Zij schreef haar brieven alleen voor zichzelf, tot ze in de lente van 1944 op radio Oranje de minister van Onderwijs,

Kunsten en Wetenschappen in ballingschap, Bolkestein, hoorde spreken. Hij zei dat na de oorlog alle getuigenissen van het lijden van het Nederlandse volk onder de Duitse bezetting verzameld en openbaar moesten worden gemaakt. Als voorbeeld noemde hij onder andere dagboeken. Onder de indruk van deze redevoering besloot Anne Frank na de oorlog een boek te publiceren. Haar dagboek zou daarvoor als basis dienen. In maart 1945 stierf Anne Frank op vijftienjarige leeftijd in het concentratiekamp Bergen-Belsen. De enige overlevende van de familie, Otto Frank, zorgde ervoor dat het dagboek van zijn dochter toch gepubliceerd werd. In 1947 verscheen Het Achterhuis. Het is sindsdien een van de meest gelezen boeken ter wereld. Het is in meer dan dertig landen verschenen en er zijn meer dan zestien miljoen exemplaren van verkocht. "Eén enkele Anne Frank ontroert ons meer dan de ontelbaren die net zo leden als zij, maar wier beeld in de schaduw is gebleven. Misschien moet dat ook zo zijn: als we het leed van alle mensen moesten en konden meelijden, zouden we niet kunnen leven." Primo Levi

Great Zimbabwe Shadreck Chirikure 2020-11-29 Conditioned by local ways of knowing and doing, Great Zimbabwe develops a new interpretation of the famous World Heritage site of Great Zimbabwe. It combines archaeological knowledge, including recent material from the author's excavations, with native concepts and philosophies. Working from a large data set has made it possible, for the first time, to develop an archaeology of Great Zimbabwe that is informed by finds and observations from the entire site and wider landscape. In so doing, the book strongly contributes towards decolonising African and world archaeology. Written in an accessible manner, the book is aimed at undergraduate students, graduate students, and practicing archaeologists both in Africa and across the globe. The book will also make contributions to the broader field such as African Studies, African History, and World Archaeology through its emphasis on developing synergies between local ways of knowing and the archaeology.

Creating Art for All Ages Frances Flicker 2019-12-01 This is book two of a series of three books. The series takes students on an interdisciplinary cross content journey entitled, Creating Art Through the Ages. Each book provides experiences in language arts, social studies, math and art as the students investigate ancient and modern civilizations. "Discovery and Knowledge", explores the ancient Roman civilization, the Middle Ages and Renaissance. Explorers set sail to discover land, treasures, raw materials and knowledge on behalf of their mother country and religion. The development of the printing press enabled the disbursement of knowledge through books. Discovery and the pursuit of knowledge is the underlying theme during this era. In this book, it is reimagined for students with experiences through stories, interactive role-playing activities, and art projects.

Profiles of American Colleges with CD-ROM Barron's Educational Series, 2006-07-01 Up-to-date information on enrollments, tuition and fees, academic programs, campus environment, available financial aid, and much more, combine to make 27th edition of Profiles of American Colleges America's most authoritative source for information on colleges and universities. College-bound students, parents, and high school guidance counselors will find information on more than 1,650 accredited four-year colleges across the United States. A CD-ROM enclosed with each copy of this comprehensive directory presents an interactive format and lets students find individual schools by entering specific criteria. In addition to the above-cited information, each college profile gives details on admission requirements, library and computer facilities, athletic facilities, extracurricular activities, e-mail addresses, fax numbers, web sites, and more. Schools are rated according to Barron's famous competitiveness scale, from "Noncompetitive" to "Most Competitive." The book's extra section of tinted pages presents a complete, quick-reference Index of College Majors—listing all available major study programs at each school. Also profiled are many of the best-known colleges in Canada and several other countries.

Essentials of Sociology George Ritzer 2015-12-10 Join the conversation with one of sociology's best-known thinkers. Essentials of Sociology, Second Edition adapted from George Ritzer's Introduction to Sociology, Third Edition, provides the same rock-solid foundation in a shorter and more streamlined format. Like the original Ritzer text, Essentials of Sociology illuminates traditional sociological concepts and theories, and focuses on some of the most compelling contemporary social phenomena: globalization, consumer culture, the Internet, and the "McDonaldization" of society. As technology flattens the globe, students are challenged to apply a sociological perspective to their world, and to see how "public" sociologists are engaging with the critical issues of today.

Profiles of American Colleges -- 2008 Barron's Educational Series, 2008-07-01 Up-to-date facts and figures on enrollments, tuition and fees, academic programs, campus environment, available financial aid, and much more make the 28th edition of Profiles of American Colleges America's most authoritative data source for college-bound high school students, their parents, and high school guidance counselors. More than 1,650 accredited four-year colleges are profiled. An interactive CD-ROM enclosed with the directory guides students to specific schools when they enter details describing their personal academic plans and aptitudes. In addition to the above-cited information, each college profile gives details on: • Admission requirements • Library and computer facilities • Admissions procedures for freshmen • Campus safety and security • Thumbnail descriptions of faculty • Requirements for a degree • Athletic facilities • Extracurricular activities • E-mail addresses • College fax numbers and web sites • Admissions Contacts • and much more Schools are rated according to Barron's well-known competitiveness scale, from "Noncompetitive" to "Most Competitive." Unlike some other publications, Barron's refrains from the unreliable practice of ranking colleges on a first-through-last basis. The book's tinted pages section presents a quick-reference Index of College Majors that lists all available major study programs at each school. Also profiled are many excellent colleges in Canada and several other countries, as well as brief profiles of religious colleges, and American colleges based in foreign countries.
