from researchers from various disciplines such as psychology, sociology, anthropology, and medicine. Gerald Adams (2001), a prominent adolescent researcher, remarked that "by the end of the 1990s the study of adolescence [had] come of age." Paralleling scholarly trends in other areas of psychology, the role of culture in

### Research Questions and Hypotheses - SAGE Publications Inc

CHAPTER SEVEN Research Questions and Hypotheses I nvestigators place signposts to carry the reader through a plan for a study. The first signpost is the purpose statement, which establishes the central direction for the study. From the broad, general purpose state-ment, the researcher narrows the focus to specific questions to be

Analyzing Focus Group Data - SAGE Publications Inc

As discussed in Chapter 1, the ways in which the earliest focus groups were designed, fielded, and analyzed were strongly influenced by their parent disci-plines, particularly social and clinical psychology and marketing research. These influences remain strong today, although much cross-disciplinary evolution has

ERIK ERIKSON'S THEORY OF IDENTITY DEVELOPMENT - Yola

The cote concept in this theory is the acquisition of an ego-identity, and the exploration of identity issues becomes the outstanding characteristic of adolescence. Although the specific quality of a person's identity differs from culture to culture, the accomplishment of this de-velopmental task has common elements in ail cultures.
