Ascendant Jack Campbell 2018-05-15 A young fleet officer and a Marine stand together to defend their colony in the continuation of the powerful and action-packed Genesis Fleet saga from New York Times bestselling author Jack Campbell. In the three years since former fleet officer Rob Geary and former Marine Mele Darcy led improvised forces to repel attacks on the newly settled world of Glenlyon, tensions have only gotten worse. When one of Glenlyon's warships is blown apart trying to break the blockade that has isolated the world from the rest of human-colonized space, only the destroyer Saber remains to defend it from another attack. Geary's decision to take Saber to the nearby star Kosatka to safeguard a diplomatic mission is a risky interpretation of his orders, to say the least. Kosatka has been fighting a growing threat from so-called rebels--who are actually soldiers from aggressive colonies. When a "peacekeeping force" carrying thousands of enemy soldiers arrives in Kosatka's star system, the people of that world, including Lochan Nakamura and former "Red" Carmen Ochoa, face an apparently hopeless battle to retain their freedom. It's said that the best defense is a good offense. But even if a bold and risky move succeeds, Geary and Darcy may not survive it...

Science Fiction and the Dismal Science Gary Westfahl, 2019-11-27 Despite the growing importance of economics in our lives, literary scholars have long been reluctant to consider economic issues as they examine key texts. This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics, with some attention to related fields such as politics and government. Its seventeen contributors include five award-winning scholars, five science fiction writers, and a widely published economist. Three topics are covered: what noted science fiction writers like Robert A. Heinlein, Frank Herbert, and Kim Stanley Robinson have had to say about our economic and political future; how the competitive and ever-changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today; and how the scholars who examine science fiction have themselves been influenced by the economics of academia. Although the essays focus primarily on American science fiction, the traditions of Russian and Chinese science fiction are also examined. A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject.

With nothing but improvised weapons and a few volunteers, Geary and Darcy must face down warships and armored soldiers—or die trying. Mele Darcy's Marines must repel repeated assaults while their hacker tries to get into the enemy systems to give Saber a fighting chance. To survive, Glenlyon needs more firepower, and the only source for that is their neighbor Kosatka or other star systems that have so far remained neutral. But Kosatka is still battling the remnants of the invasion forces on its own world, and if it sends its only remaining warship to help will be left undefended against another invasion. While Carmen Ochoa fights for the freedom of Kosatka, Lochan Nakamura must survive assassins as he tries to convince other worlds to join a seemingly hopeless struggle. As star systems founded by people seeking freedom and autonomy, will Kosatka, Glenlyon and others be able to overcome deep suspicions of surrendering any authority to others?
